Co-curricular Activities

Co-curricular activities are an integral part of curriculum which provide educational opportunities to the students and thereby help in broadening their experiences. Co-curricular activities can be defined as the activities that enhance and enrich the regular curriculum during the normal school hours.

All co-curricular activities are organised with a specific purpose. These activities are designed to meet the needs of the students and cover a wide range of their abilities and talents. Such activities stimulate the interest of students and provide equal opportunities to all the students to participate. These activities enhance the learning experience of the students and help in recognizing and developing their innate skills such as leadership qualities, creative or innovative skills etc. Co-curricular activities give the students a chance to think out of their box and get creative ideas of their own. These activities help the students in developing rich learning experiences by giving them a chance to think in new ways to solve a problem or answer a question.

The normal curriculum gives students an insight into theoretical aspect of the concepts taught but extra-curricular activities help the students to apply what they have learnt in their practical life. These activities help in developing the grasping power of the students and provide an opportunity to them to work in teams, thus, developing team spirit in them.

We are indeed proud of Shivam of class XII who has been declared Best Pianist in the National Level Open Music Competition organised by Trinity College of Music, London on 13-14 November 2013 in Jesus and Mary College, New Delhi.
